

National Institutes of Health
Office of Research on Women's Health

In 2021, NIH issued the [Final NIH Policy for Data Management and Sharing](#) (effective January 25, 2023) to promote scientific data sharing. Sharing scientific data accelerates biomedical research discovery and rigor, in part, by enabling validation of research results, providing accessibility to high-value datasets, and promoting data reuse for future research studies ([Scientific Data Sharing](#)). As outlined in Strategic Goal Two of the [NIH-Wide Strategic Plan for Research on the Health of Women](#), advancing science for the health of women requires data science and data management practices with innovative research methods, measurements, and cutting-edge technologies to prevent and treat conditions affecting women. The below list of selected NIH-supported data resources is provided to support data science, sharing, and innovation across the women's health research ecosystem.

[Add Health](#)

[Biomedical Research Informatics Computing System \(BRICS\)](#)

[National Clinical Cohort Collaborative \(N3C\)](#)

[AgingResearchBiobank](#)

[ClinicalTrials.gov](#)

[NIH Common Fund Data Ecosystem](#)

[All of Us Researcher Workbench](#)

[Common Data Elements \(CDE\) Repository](#)

[PhenX Social Determinants of Health \(SDOH\) Collection](#)

[Analysis Visualization and Informatics Lab-space \(AnVIL\)](#)

[DiscoverWHR](#)

[SchARE: Science Collaborative for Health disparities and Artificial Intelligence Reduction Errors](#)

[BioDataCatalyst](#)

[ImmPORT](#)

[The Database of Genotypes and Phenotypes \(DbGaP\)](#)

[Biologic Specimen and Data Repository Information Coordinating Center \(BioLINCC\)](#)

[Medical Imaging and Data Resource Center \(MIDRC\)](#)

[Trans-NIH BioMedical Informatics Coordinating Committee \(BMIC\)](#)

[National Addiction & HIV Data Archive Program](#)
